

## Magenta Underwriter

## M diagram - Underwriter Step-by-Step Guide

Magenta contains an underwriting function; which allows an underwriter to manage multiple agents with multiple schemes.

- > Declarations management
- > Easy set up of new agents and new schemes
- > Non-Magenta Claims system import
- > 3rd Party Cost Management
- > Legal Expenses Management
- > Tailorable Earnings Patterns
- > Underwriter Declaration Reporting
- > Triangulation Reporting
- > Export reports to Excel
